DIARY NOTES

DD/S

27 September 1965

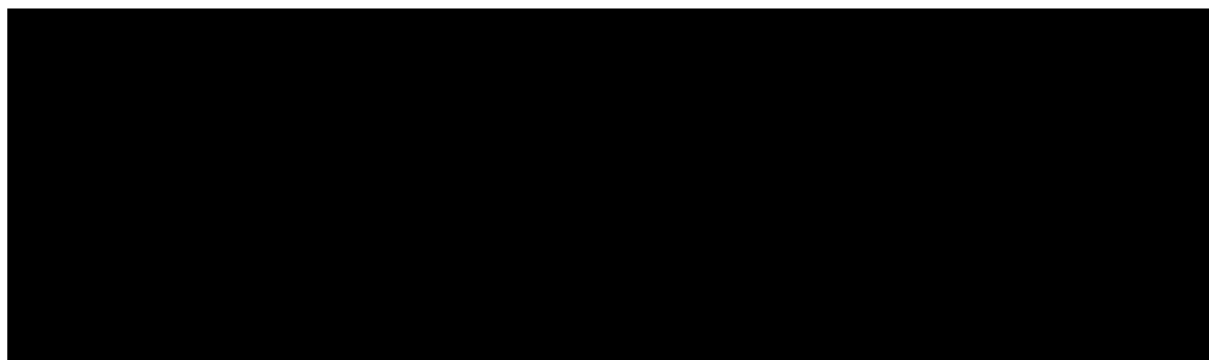

1. Dick Helms asked whether adequate lighting would be provided in the new parking lot. I assured him that it would. (I do not know the reason for his inquiry.) 25X1A

25X1A 3. Robert Margrave, Director of Munitions Control of the Department of State, called to say that he will take a trip to Paris in the latter part of October for the United States Military Information Control Committee (US-MICC) to discuss several problems involving the new NATO atomic agreement. Bob asked that [redacted] accompany him on this trip because of Gene's experience and past usefulness to the Committee. Bob said that George Murphy of the Joint Committee on Atomic Energy might attend the discussions as an observer. Since Mr. Murphy was particularly friendly with Gene during a previous trip, 25X1A the latter could facilitate smooth handling of any difficulties or problems raised by Mr. Murphy should he attend. I passed this request to [redacted] who will make arrangements for Gene to participate.

25X1A 4. Des FitzGerald complained to me about the reaction he had from a plague shot administered by the Office of Medical Services on Friday, 24 September. I checked with John Tietjen, who said that Des had had the same reaction before but that it was not serious. 25X1A
